

High Speed Interfaces for Machine Vision

Paulo Possa

Delft, the Netherlands

21 June 2023

Organized by Penta projects:
2020005 Mantis Vision
2021004 Imagination

Overview

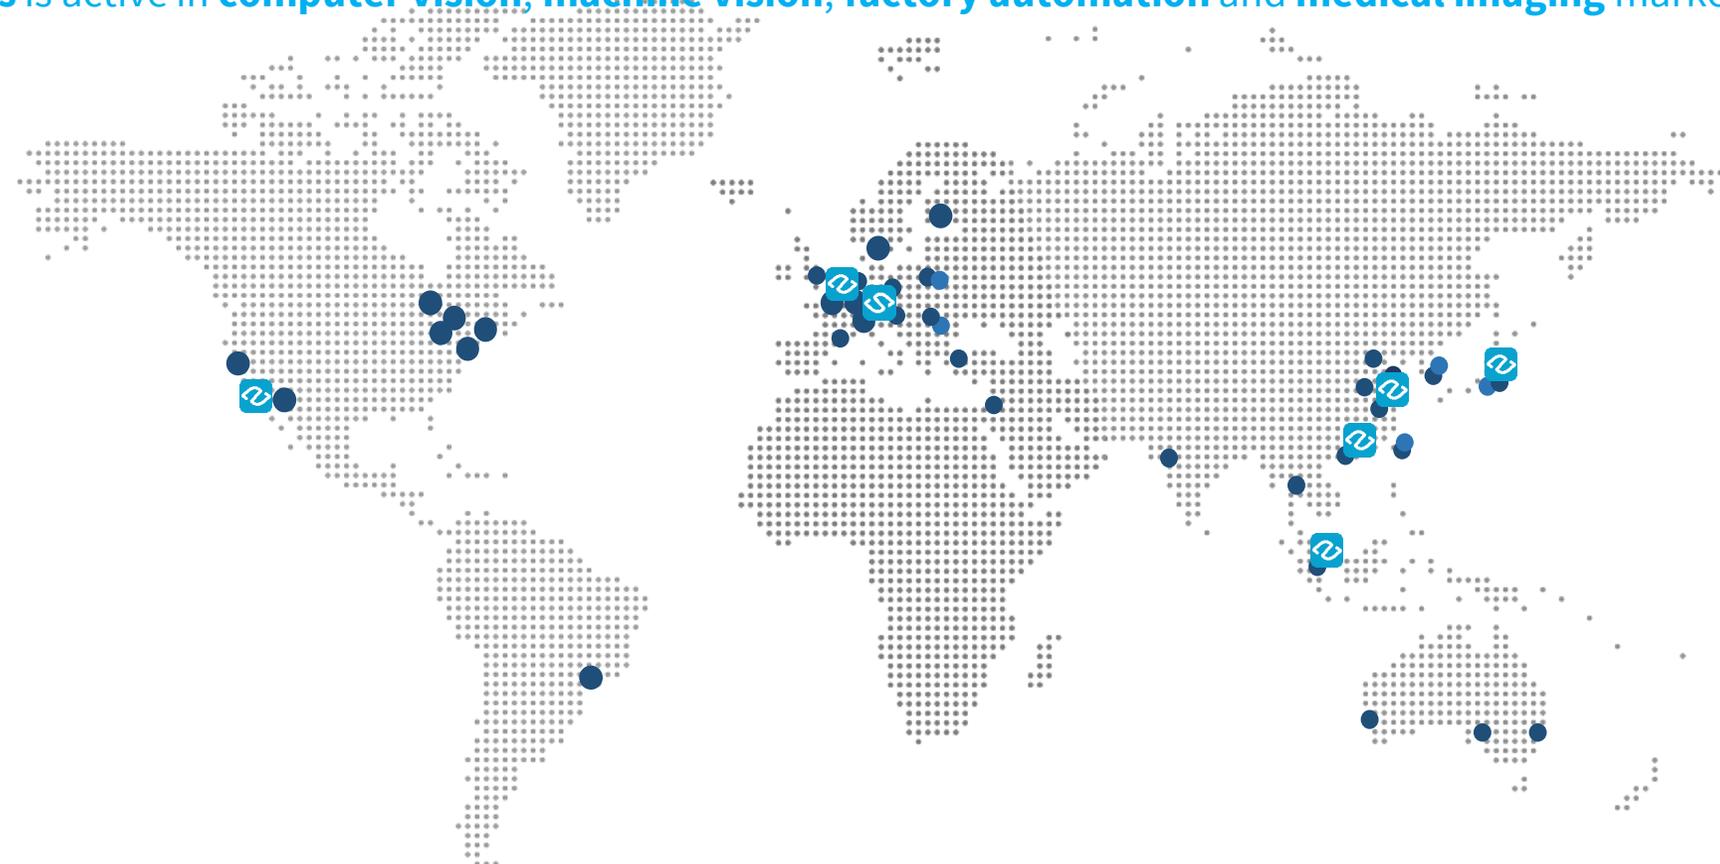

- What is Machine Vision?
- Machine Vision & Standards
- High-speed Interface Standards
 - Camera Link
 - CoaXPress
 - Camera Link HS
 - GigE Vision
 - USB3 Vision
- Interface Standards Comparison
- **BONUS:** Universal software interface => GenICam

Euresys is a leading and innovative high-tech company, designer and provider of image and video acquisition components, frame grabbers, FPGA IP cores and image processing software.

Euresys is active in computer vision, machine vision, factory automation and medical imaging markets.

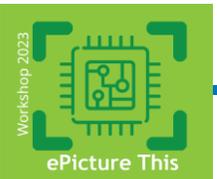

Member of:

&

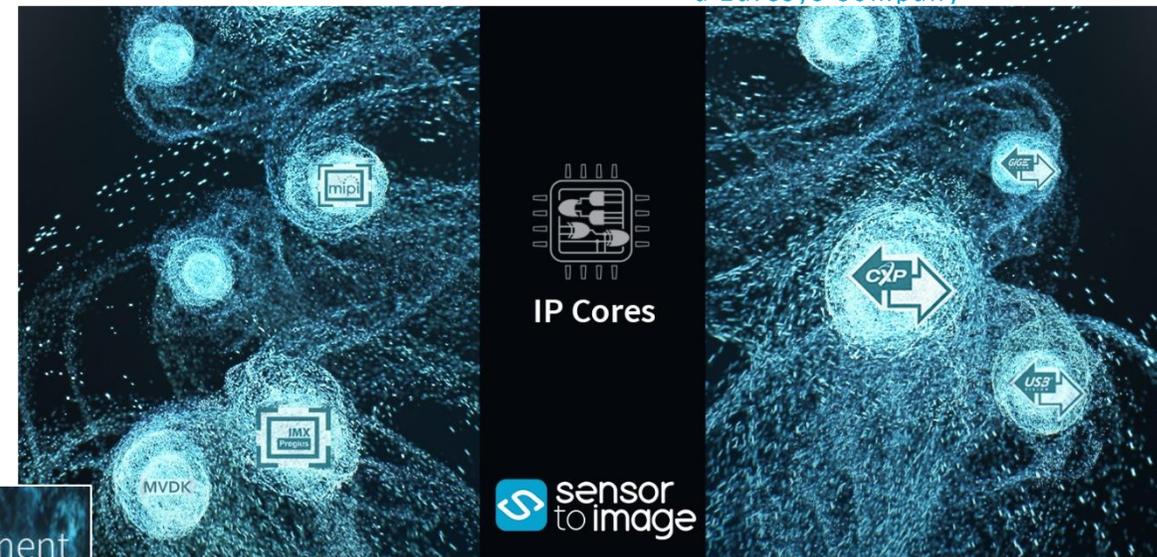

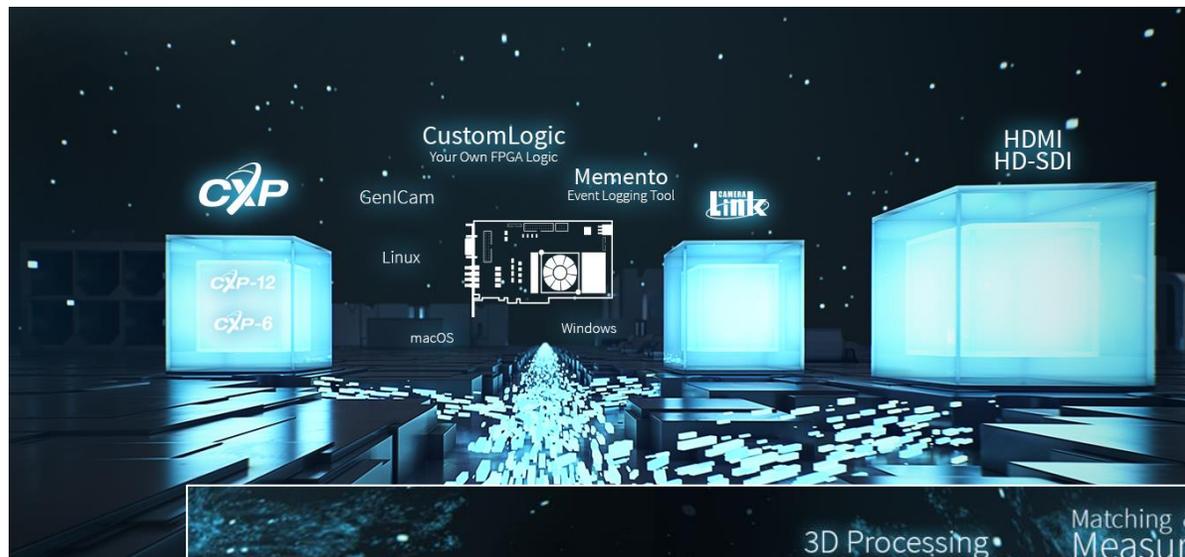

Technical Committees

Organized by Penta projects:
2020005 Mantis Vision
2021004 Imagination

What is Machine Vision?

“Machine Vision is an especial case of the Computer Vision field where a computer vision system is integrated into a machine to automate its process”

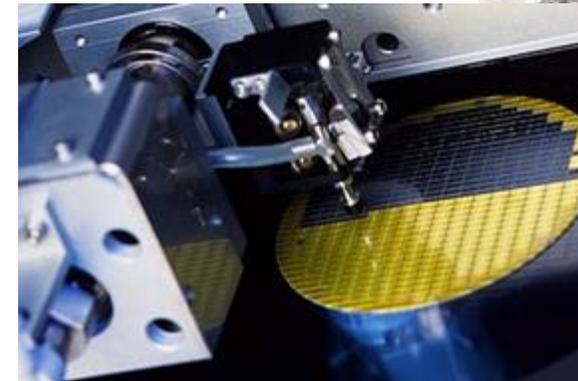

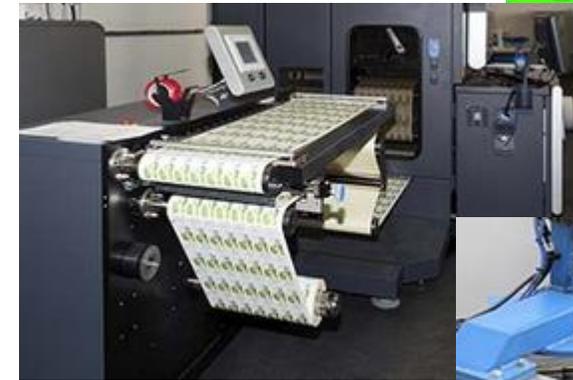

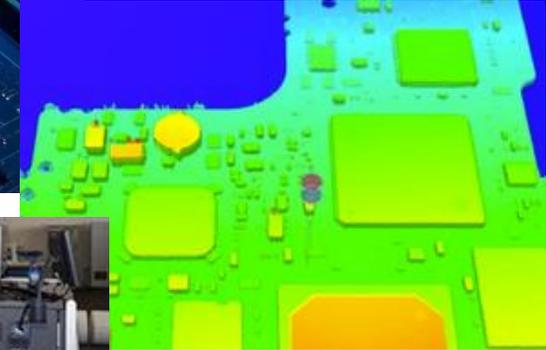

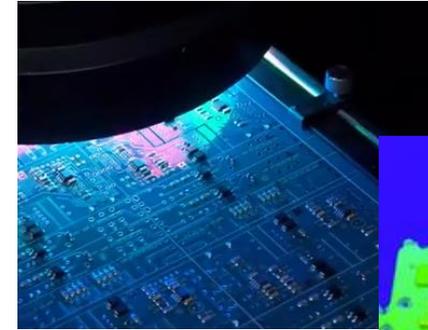

What is Machine Vision?

Goals:

- Quality, repeatability, and speed

Typical Applications:

- AOI, 3D SPI, BGA ball inspection
- Flat Panel Display inspection
- PCB alignment
- Pick and place
- Wire and die bonding
- LED inspection
- Printing and packaging
- Food inspection and sorting
- Glass inspection
- Surface inspection

Machine Vision & Standards

The use of products compliant to international standards is key to guarantee the interoperability between components from different manufactures

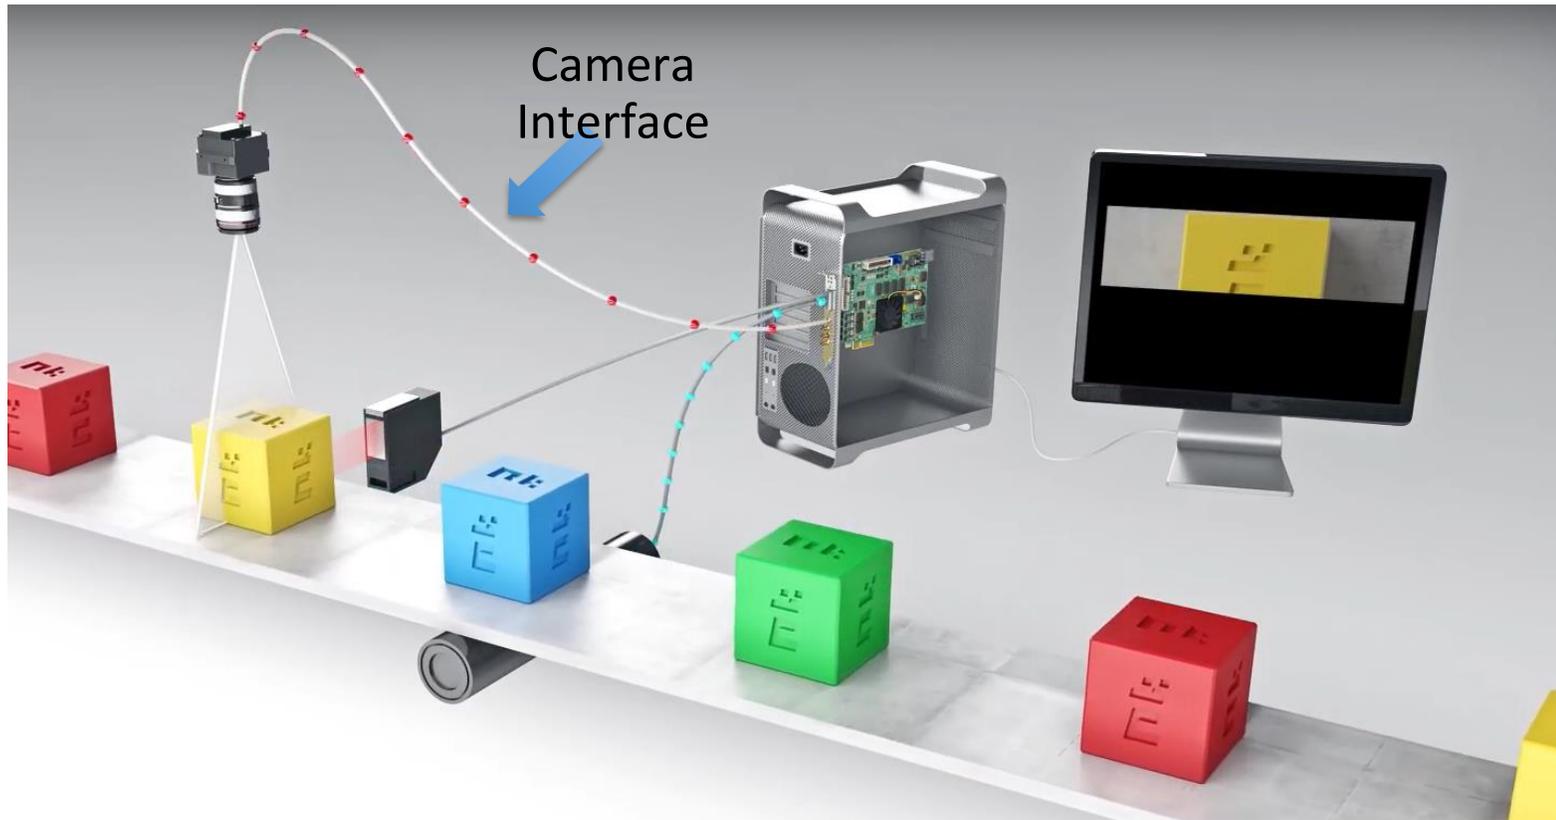

The image displays five logos for international machine vision standards organizations, arranged in two rows. A large blue bracket on the right groups all five logos under the G3 logo for Global Coordination of Machine Vision Standardization.

G3
GLOBAL COORDINATION OF MACHINE VISION STANDARDIZATION

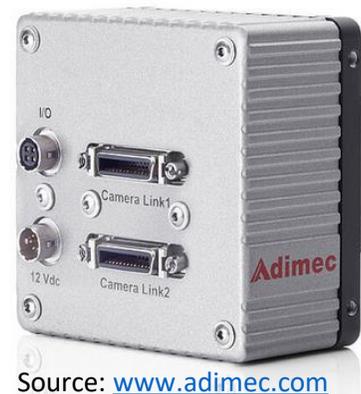

High-speed Interface Standards

- Transfer images to the host PC
- WR/RD camera registers
- Control acquisition (triggers)
- (Optional) Transfer camera events/alarms
- (Optional) Power the camera

- Standard association: **A3 (October 2000)**
- Max bandwidth: **850 Mbytes/s @ 80-bit mode (2x cables)**
- Max cable reach: **7 m**
- Receiver type: **Frame grabber**
- Power over Cable: **Yes**
- Camera trigger: **4 direct signals**
- Roadmap: **None**

- Standard association: JIA (December 2010)
- Max bandwidth: 1250 Mbytes/s (1x cable @ CXP-12)
5000 Mbytes/s typical (4x cables @ CXP-12)
- Max cable reach: 40 m (coax) / 40 km (fiber)
- Receiver type: Frame grabber
- Power over Cable: Yes (coax)
- Camera trigger: Packet based (2 ns precision)
- Roadmap: 2500 Mbytes/s (coax)
3125 Mbytes/s (fiber)
6250 Mbytes/s (fiber)

3400 Mbytes/s (7 m)

5000 Mbytes/s (40 m)

- Standard association: A3 (May 2012)
- Max bandwidth: 1200 Mbytes/s (1-lane @ C3)
8400 Mbytes/s typical (7-lane cable @ C3)
- Max cable reach: 15 m (copper) / 5 km (fiber)
- Receiver type: Frame grabber
- Power over Cable: No
- Camera trigger: Packet based (3.2 ns precision)
- Roadmap: 3125 Mbytes/s (fiber)
6250 Mbytes/s (fiber)

Source: www.alsium.com

- Standard association: **A3 (May 2006)**
- Max bandwidth: **1100 Mbytes/s (1x cable @ 10G)**
- Max cable reach: **100 m (CAT-5e) / 5 km (fiber)**
- Receiver type: **Common PC interface**
- Power over Cable: **Yes**
- Camera trigger: **Packet based (PTP precision)**
- Roadmap: **3125 Mbytes/s (25G)**
RoCE v2 (RDMA)

Source: www.fs.com

- Standard association: **A3 (January 2013)**
- Max bandwidth: **400 Mbytes/s (SuperSpeed Gen1)**
- Max cable reach: **3 m (copper) / 100 m (AOC)**
- Receiver type: **Common PC interface**
- Power over Cable: **Yes**
- Camera trigger: **Packet based**
- Roadmap: **800 Mbytes/s (SuperSpeed+ Gen2x1)**
1600 Mbytes/s (SuperSpeed+ Gen2x2)
Thunderbolt

Interface Standards Comparison

	High Bandwidth	Max Cable Reach	Low Latency	High Trigger Precision	Low CPU Load	Low System Cost	Popularity
Camera Link	✓✓	✓	✓✓✓✓✓	✓✓✓✓✓	✓✓✓✓✓	✓✓✓	✓✓✓
CoaXPress	✓✓✓✓,✓	✓✓✓✓✓	✓✓✓✓	✓✓✓✓	✓✓✓✓✓	✓✓	✓✓
Camera Link HS	✓✓✓✓✓	✓✓✓✓	✓✓✓✓	✓✓✓	✓✓✓✓✓	✓	✓
GigE Vision	✓✓✓	✓✓✓✓	✓✓	✓✓	✓	✓✓✓✓	✓✓✓✓✓
USB3 Vision	✓	✓✓	✓	✓	✓✓	✓✓✓✓✓	✓✓✓✓

BONUS

Universal software interface => GenICam

- EMVA (September 2006)
- Genicam support for camera control and image acquisition
 - GenAPI: camera and frame grabber control API
 - GenTL: image delivery API, camera communication API

Frame Grabbers

Standard IPs

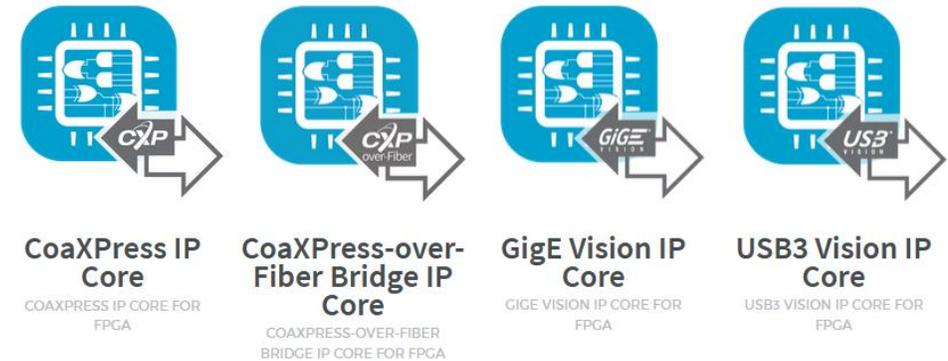

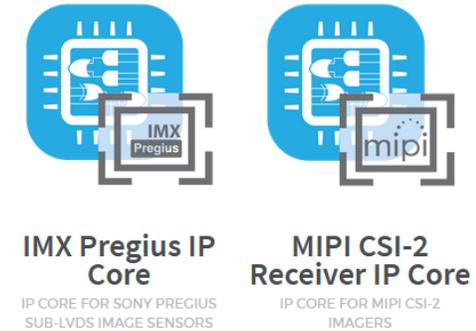

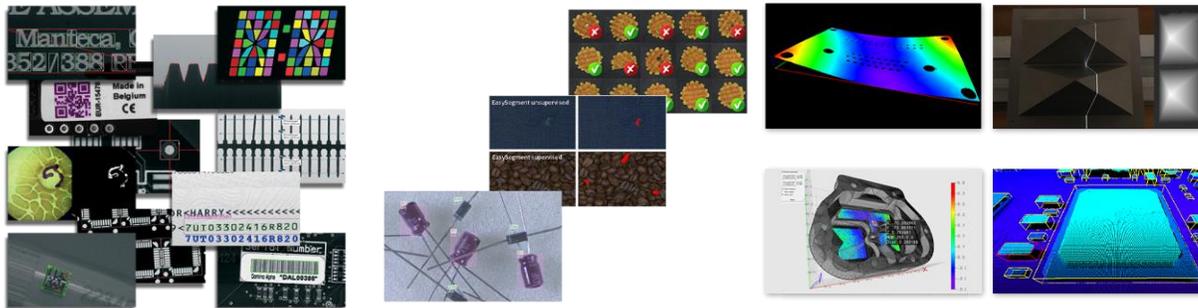

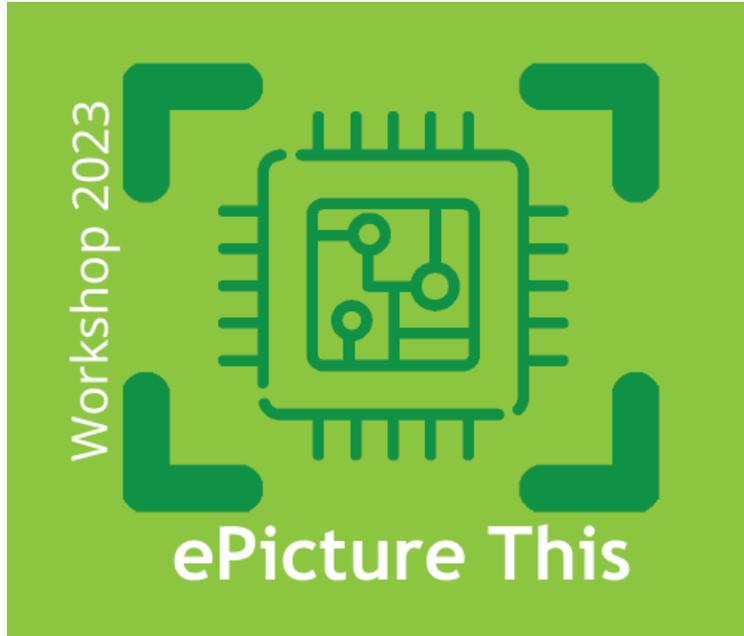

Image Processing Libraries
